## **Economic Affairs Interim Committee Hearing – March 27, 2014**

### **Producer Testimony**

I am a member of the Montana Milk Producers Association. As a milk producer, I am in favor of the 12-day rule because it serves the best interests of the Montana milk consumers and the Montana milk industry.

Milk competes with other beverages in the marketplace. To compete successfully, the Montana dairy industry must consistently provide the milk consumer a fresh, tasty product.

The 12-day rule insures that whenever milk is purchased in the state of Montana, the consumer will have a reasonable amount of shelf life left for that product to remain fresh of a high quality. As it stands, milk consumers, based upon their past experiences, have an expectation that their milk will be fresh and of a high quality.

Doing away with the 12-day rule would jeopardize the expectation, as the determination of for how long milk may be sold will be left to retailers, who do not necessarily share our concern about the Montana milk industry. To us, if a consumer has a bad experience with milk, we may lose that consumer forever—they may simply choose to purchase other beverages, including products like almond and soy milk.

Our livelihood depends upon happy and satisfied milk consumers. The 12-day rule helps insure that consumers are provided fresh, high quality milk every time they make a milk purchase.

On behalf of all Montana milk producers, I would urge you not to remove the 12-day rule.

March 5, 2014

Senator Tutvedt, Chairman  
Economic Affairs Interim Committee  
PO Box 201706  
Helena, MT 59620-1706

Dear Senator Tutvedt and Members of the Committee -

We are writing this letter to express our continued support for the "12-Day Rule". This issue is simply about providing high quality product to Montana's consumers. Montana's dairy farmers work tirelessly and are very proud of the high quality milk that they provide to Montana's consumers. Under the 12-Day rule the burden for insuring high quality milk is place on the producers and the processors - where it should be. If the 12-Day rule is removed that burden will be placed squarely on the consumer because producers and processors will no longer have to be diligent about inventory control.

The number of Montana dairies continues to decline. Over the last 12 years we have lost nearly half of our dairy farms. With market share competition from other products such as almond milk and soy milk, it is more critical than ever to provide only the highest quality product. Please do not put at risk a system that works well for Montana dairy farmers, Montana processors, Montana distributors, and most importantly, Montana consumers.

Dear Senator Tutvedt and Members of the Committee

We are writing this letter as consumers to express our continued support for the "12-Day Rule". This issue is simply about providing high quality product to Montana's consumers. We support Montana's dairy farmers and the great product that they provide to us and our communities.

As consumers, we are fully capable of understanding that a sell date means that the product must be sold by that date. We are not confused as to whether this is a use by date or a best by date. We understand that this is a sell by date. We appreciate and want this method of dating because that means that once we get the milk in our refrigerators it will last until our family has enjoyed every last drop. For some of us, we travel many miles to buy our groceries and it isn't as simple as "running to the store" if our milk is bad. We need a longer shelf life in our refrigerator and like the way that this works now.

Please keep the 12-Day rule in place so that we can continue to have fresh milk in our refrigerators.

Dear Senator Tutvedt and Members of the Committee –

We are writing this letter as consumers to express our continued support for the "12-Day Rule". This issue is simply about providing high quality product to Montana's consumers. We support Montana's dairy farmers and the great product that they provide to us and our communities.

As consumers, we are fully capable of understanding that a sell by date means that the product must be sold by that date. We are not confused as to whether this is a use by date or a best by date. We understand that this is a sell by date. We appreciate and want this method of dating because that means that once we get the milk in our refrigerators it will last until our family has enjoyed every last drop. For some of us, we travel many miles to buy our groceries and it isn't as simple as "running to the store" if our milk is bad. We need a longer shelf life in our refrigerator and like the way that this works now.

Please keep the 12-Day rule in place so that we can continue to have fresh milk in our refrigerators.

Sincerely,

Dear Senator Tutvedt and Members of the Committee

We are writing this letter as consumers to express our continued support for the "12-Day Rule". This issue is simply about providing high quality product to Montana's consumers. We support Montana's dairy farmers and the great product that they provide to us and our communities.

As consumers, we are fully capable of understanding that a sell date means that the product must be sold by that date. We are not confused as to whether this is a use by date or a best by date. We understand that this is a sell by date. We appreciate and want this method of dating because that means that once we get the milk in our refrigerators it will last until our family has enjoyed every last drop. For some of us, we travel many mile to buy our groceries and it isn't as simple as "running to the store" if our milk is bad. We need a longer shelf life in our refrigerator and like the way that this works now.

Please keep the 12-Day rule in place so that we can continue to have fresh milk in our refrigerators.
